

The California Foster Family System is on the Verge of Collapse

Foster Family Agencies May Soon Shut Down Because of a Lack of Insurance

The insurer that covers 90% of California's foster family agencies (FFAs) has announced that **mass nonrenewal of FFAs is imminent** — unless changes are made to the judicial process.

- ✓ We need to make sure that responsible parties pay their fair share when they cause injury.
- ✓ The Foster Family Agency Accountability Act (AB 2496) would curb jackpot verdicts that punish nonprofit FFAs for the bad acts of others. This threatens the health and safety of the children in California's foster care system and must be stopped.
- ✓ Nothing in AB 2496 will prevent injured foster children from recovering damages from responsible parties.
